Due with registration

Register soon as class size is limited!

St. Paul's Science Central Enrichment

Established October 1991

There are three sessions of Science Central and each one introduces new, exciting topics designed to support a child's natural curiosity about the world around them.

Mrs. Wiltshire loves to explore the world of why and how as much as any child! Science central offers the opportunity to learn about the world around us with hands-on experiments and observation. Children engage in Science, Technology, Engineering and Math (STEM).

Topics include:

Magnets, Sound, Electricity, Insects, Plant Life, Ocean Life, Simple Physics, Space, Cooking, Weather, Animals and Pets.

Children participate in building a Gingerbread house for display in Peddler's Village and in Green Thumbs visits with Mrs. Merz.
